

The SCUPAD Congress

The annual SCUPAD Congress grew out of an Urban Planning Session of the Salzburg Seminar held in 1965. The congress brings together 40–60 experts in the field of regional planning, design and development from all over the world. With its congresses, SCUPAD attempts to raise topics for discussion of a contemporary nature and of critical relevance to urban planning and development. The wide variety and high level of professional experience among the participants engenders creative exchanges about research results, new concepts, policy directions in planning and development. The size and informal atmosphere of the SCUPAD Congress facilitate personal input and create a lively social and professional network that carries on beyond the Congress.

Venue

The Congress will take place in Salzburg (Austria) in the Leopoldskron Castle, seat of the Salzburg Seminar

Schloss Leopoldskron
Leopoldskronstrasse 56-58, box 129
A-5010 Salzburg
Austria
Tel. +43 (662) 839830
Fax: +43 (662) 839837
E-mail: conferencecoordination@salzburgseminar.org
<http://www.salzburgseminar.org/>

Salzburg can be easily reached by plane (Salzburg Airport or Munich Airport), by train (<http://www.oebb.at>) or by car.

SCUPAD Secretary

Yvette Shiffman

Congress 2005

Metamorphosis 1960s–2040

Challenges of Shaping the Future

Salzburg, Austria
2005, May 19–22

Metamorphosis 1960s–2040

Challenges of Shaping the Future

Forty years ago, a group of architects and planners established SCUPAD after attending a Salzburg Seminar on Urban Planning and Development. To mark this anniversary, the SCUPAD Congress 2005 will look back over the last forty years to reassess past practices, learn lessons of that experience and look forward to encourage a direction of fresh and sustainable planning principles.

The rationale of the 1960s, facing post-war recovery and development, is different from the rationale of the 21st century, facing environmental, global and societal issues. Massive urban planning projects and preconceived ideas marked the 1960s and were influenced by the ideas and designs of Le Corbusier. In contrast, citizen participation, incremental change and democratic process, as embodied in the precepts of Jane Jacobs and others, have gained new influence and increasingly dominate current thinking. In fact, both strategies have always been evident with the balance between them shifting in time and place.

Keynote speakers, case studies and workshop discussions will reflect on this evolution and transition. Participants will engage in a conversation on how planners can best incorporate these lessons in forward thinking planning theory and practice.

In so doing, the Congress will examine:

- What did we learn from the recent past?
- What are the ways to deal with the challenges now and into the future?
- How can we combine lessons from the past and current challenges in developing planning strategies for the future within the broadest context of world issues?

Congress Programme

Thursday May 19th 2005

Afternoon Arrivals
